

## Waste Handling Grapples

### Municipal Waste Grapple

**Builtrite Municipal Waste Grapples** are designed for curbside pick-up applications, capable of handling white goods, brush, municipal waste, carcasses, etc. The arm curvature is designed such that it will not dig into the turf, minimizing sod damage or dirt contamination with the material being handled. These grapples are ideally suited for truck mounted material handlers (knuckleboom loaders) and smaller wheeled excavators / material handlers. The finest materials are used to provide maximum durability, exceptional performance and low maintenance, reducing your downtime. Key features include:

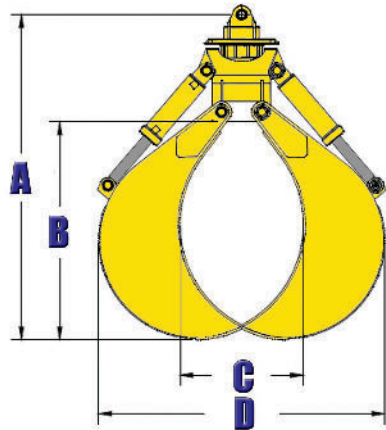

- 280° non-continuous or optional 360° continuous rotation, using a heavy duty Indexator Rotator.
- 42" or 48" wide jaws for large capacities.
- High tensile steel used throughout.
- Oversized, hardened cylinder and arm pivot pins with replaceable bushings.
- Easily accessible, yet well protected grease zerks.
- Made in U.S.A.

If you're looking for the toughest, most durable grapple on the market, look no further...make it a **Builtrite**.
